

GGCWS Portal Documentation

1. Introduction

The **Student Portal Management System** is a web-based application designed to manage academic activities of students and administrators in an organized and efficient way. It provides a digital platform where students can access course materials, submit assignments, take quizzes, view results, and track their academic performance.

The system is divided into two main parts:

1. **Admin Portal**
2. **Student Portal**

The **Admin Portal** allows administrators to manage courses, assignments, quizzes, exams result, and student data. The **Student Portal** allows students to interact with the system by viewing their courses, submitting assignments, attempting quizzes, and checking results and view announcement.

2. Objectives of the Project

The main objectives of the Student Portal Management System are:

- To provide a centralized platform for managing student academic activities
- To enable students to access course materials and information easily
- To manage assignments and submissions in a digital format
- To conduct online quizzes for student evaluation
- To upload and manage student results efficiently

- To provide a system for posting announcements and updates
 - To allow administrators to manage academic records effectively
-

3. Scope of the Project

The scope of the Student Portal Management System includes:

- Managing student information and records
 - Managing courses and uploading study materials
 - Assignment creation, submission, and tracking
 - Quiz creation and management system
 - Result uploading and viewing system
 - Announcement posting system
-

4. User Roles

There are two main users in the system.

5.1 Admin

The admin is responsible for managing the overall system operations. The responsibilities include:

- Adding and managing student accounts
- Creating and managing courses
- Uploading assignments
- Creating and managing quizzes
- Uploading results
- Posting announcements
- Monitoring student performance

5.2 Student

Students interact with the system to access academic content and perform academic activities. The responsibilities include:

- Viewing enrolled courses
- Accessing study materials
- Submitting assignments
- Attempting quizzes
- Viewing and downloading results
- Viewing announcements

The admin has full access to the system and can modify or update data whenever required. This module ensures that all academic activities are properly organized, controlled, and monitored.

5. System Modules

The system consists of multiple modules that perform different tasks.

6.1 Admin Module

The Admin Module is responsible for managing the entire system. It enables the administrator to control all academic activities and maintain system data efficiently.

Main functions of the Admin Module include:

- Adding and managing student accounts
- Creating and updating course information
- Uploading assignments and setting deadlines
- Creating quizzes and managing quiz questions
- Uploading results and posting announcements

The admin has full access to the system and can modify or update data whenever required. This module ensures that all academic activities are properly organized and monitored.

6.2 Student Module

The **Student Module** allows students to interact with the system and access their academic information.

Main functions of the Student Module include:

- Logging into the portal using a username and password
- Viewing enrolled courses and course materials
- Downloading learning resources provided by the admin
- Submitting assignments before the deadline
- Attempting quizzes and examinations
- Viewing results and grades
- Checking performance through charts and analytics

This module helps students stay informed about their academic activities and monitor their progress

Courses Module

The **Courses Module** manages all academic courses available in the system.

Admin Functions

- Add new courses
- Edit course details
- Delete courses

- Assign courses to students

Student Functions

- View enrolled courses
- Access course materials

Benefits

- Organizes academic subjects
- Provides easy access to course content

Assignment Module

The **Assignment Module** allows teachers/admins to give assignments and students to submit them online.

Admin Functions

- Create assignments
- Set deadlines
- Upload assignment instructions
- Review submissions
- Give marks or feedback

Student Functions

- View assignment details
- Upload assignment files
- View feedback

Benefits

- Eliminates paper-based submissions

- Keeps assignment records organized
-

Quiz Module

The **Quiz Module** allows admins to create online quizzes for students.

Admin Functions

- Create quiz questions
- Set time limits
- Set quiz availability dates
- Review student scores

Student Functions

- Attempt quizzes
- Submit answers
- View scores

Benefits

- Helps evaluate student knowledge
 - Provides quick feedback
-

Announcement and Result Module

The Announcement and Result Module is responsible for managing academic updates and student results within the system. It ensures smooth communication between the administrator and students while maintaining accurate academic records.

Admin Functions:

- Uploading announcements for students
- Editing and deleting announcements
- Uploading student results
- Updating or modifying results when required

Student Functions:

- Viewing announcements
- Viewing uploaded results
- Downloading results for personal record

This module ensures that all important academic information is delivered efficiently and that students can easily access and download their results whenever needed.

Notification and Reminder Module

The **Notification and Reminder Module** is designed to keep students informed about important academic activities. It automatically sends alerts and reminders related to assignments, attendance, announcements, quizzes, and examinations.

This module helps students stay organized and prevents them from missing important deadlines or academic updates.

Types of Notifications

1. Assignment Due Date Reminder

Students receive a notification when an assignment deadline is approaching. This reminder helps them submit assignments on time.

Example:

"Reminder: Your Database Assignment is due tomorrow."

2. Announcement Notification

Whenever the admin or teacher posts a new announcement, students receive a notification.

Example:

"New Announcement: Midterm exam schedule has been uploaded."
